Chapter 1. Introduction

Let's implement simple internet store where you can create, paid order and where system can change it's state....

1.1. build, test, run

build, run and test using gradle / docker

```
./gradlew
java -jar build/libs/*.jar
bash build/libs/*.jar

./gradlew build composeUp
./gradlew composeDown
```

build, run and test using maven / docker

```
./mvnw
java -jar target/*.jar
bash target/*.jar

bash mvnw docker-compose:up -P docker
bash mvnw docker-compose:down -P docker
```

Initially generated by using generator-jvm yeoman generator (kotlin-spring-boot)

Chapter 2. Implementation

TODO: implement documentation...
